MEMORANDUM FOR THE CHAIRMAN, MILITARY AGENCY FOR STANDARDIZATION

SUBJECT: Sea Transport of Heavy Vehicles

Reference: Memo frm London Chairman, PBOS (Ref ST 17/12/031) dtd 1 June 1956

1. The following is an extract from referenced memorandum:

"The Working Party also recommended that the question of lifting points on vehicles should be brought to the attention of the Military Agency for Standardisation in order that they should study the possibility of standardising fittings for lifting on vehicles and of establishing a system of marking these lifting points. In this respect they especially drew attention to the desirability of designing and fitting hubcap fittings to enable wheeled vehicles to be lifted with simple slings which could be quickly attached and detached.

It would be appreciated if the Standing Group would inform the Military Agency for Standardisation of the above views and request the Agency to forward any comments direct to the London Chairman of the Planning Board for Ocean Shipping."

2. You are requested to examine, together with the Planning Board for Ocean Shipping, the proposals contained in the above extract, with a view to deciding whether or not the appropriate Board of the MAS can draw up a standardization agreement.
