SOLEP/323/54

MEMORANDUM FOR THE SECRETARY GENERAL, NORTH ATLANTIC TREATY ORGANIZATION

(For attn. Assistant Secretary General, Production and Logistics)

SUBJECT:- Standardisation.

1. Information has just been received from Standing Group, that provided no unforeseen difficulties arise, it should be possible for them to make clear their position on comparative trials of equipment within the very near future.
2. The release of research and development information to the U.A.S. is a complicated subject and has of necessity been referred to the Standing Group Research and Development Committee, the Standing Group Security Committee, as well as the J.P.C.C. The final report on this matter is now being prepared.
3. Both of the Standing Group studies referred to above are being expedited in order to complete them, if possible, before the April meeting of the Standing Group and Council.

FOR VICE ADMIRAL.
